Description

The Journal of Community Services in Sustainability (JOCSS) is a medium for disseminating the results of community service implementation which are presented based on the principles of writing scientific articles. The scope of scientific fields in this journal consists of various fields of knowledge or multidisciplinary sciences which aim to improve empowerment and service, the application of Industry 4.0 and the application of appropriate technology in the Micro, Small and Medium Enterprises Industry (MSMEs). This journal is published twice a year (April and October) and is managed by the Research and Community Service Unit (P2M), STMI Jakarta Polytechnic. Accepted manuscripts can be in Indonesian or English, after going through a thorough peer-review process..
